Project Coordinator
Regional Council of Lapland

Smart and International Lapland

6/2019 – 12/2021

21 municipalities

The project goal is to help municipalities utilise and develop the international co-operation in Lapland and activate them in applying for direct EU funding.

We'll achieve the goal by

- Increasing knowledge about smart specialisation
 - Supporting municipalities in strengthening their networks
 - Helping municipalities prepare for the next programme period 2021–2027
 - Helping create five pilot projects from direct EU funds.

Internationalisation as a tool

- The objective of strategic international co-operation is to increase the produced added value for everyday life in Lapland and support regional growth
- The base of internationalisation is the regional ecosystem
- Cluster organisations and other networks bring regional actors effectively together
- Integrating into EU cluster work and networks – co-operation across EU borders
- [Smart Specialisation Strategy](#) guides the work – co-operation is done under the Arctic Smartness brand
